Clarification regarding Rounding off the values of Colour Television

The permittee/manufacturers while determining the star rating, rounding off the values shall be done with reference to IS 2:1960, reaffirmed 2000, Edition 2.3, keeping in view the following points for rounding; namely:-

- (i) the values of annual energy consumption (kWh/annum), shall be rounded and recorded upto two decimal places;
- (ii) the values of power consumption (W) shall be rounded and recorded upto three decimal places;
- (iii) The values of screen size (centimetre) shall be rounded and recorded upto two decimal figures;
